

TriEx Sf9 Cells

Product Information

Product Name

TriEx Sf9 Cells

Research Area

Insect cell line

Application

BacMagic. Recommended for preparation of high titer virus stocks and protein yields by either baculovirus infection or transfection with appropriate vectors.

Unit Size

3 vial

Concentration

1 x 10⁷ cells

Species

S. frugiperda, *Spodoptera frugiperda*

Cell Line

Sf9

Storage Conditions

liquid nitrogen

Shipping Conditions

Dry Ice Only

Media Adaptation

Serum-free TriEx Insect Cell Medium

Contents & Storage

After recovery from the frozen stock, the cells can be grown as semi-adherent cultures in tissue

TriEx Sf9 Cells

culture flasks or in suspension as shaker cultures. Cells are shipped on dry ice. Upon receipt, the vials should be removed from their container and either recovered immediately, or placed at -70°C and used within two weeks. For longer-term storage, place in liquid nitrogen.
